BAKER BROS. NURSERY

WHOLESALE PRICE LIST

FALL 1952

- LINING OUT STOCK
- CONIFEROUS EVERGREENS
- BROADLEAF EVERGREENS
- FLOWERING SHRUBS
- SHADE TREES
- ORNAMENTAL TREES
- ROSES
(PATENTED AND STANDARD VARIETIES)
- CONTAINER-GROWN STOCK

P. O. BOX 828 105 NORTH CHANDLER ST. VI-2222
FORT WORTH, TEXAS

In our **68th Year** of serving satisfied customers we have a complete stock with good assortment.

We offer van truck delivery in truckload lots direct from our nursery to you. The stock is picked up in our fields and arrives in good condition, due to special care in packing and minimum of handling.

In addition to our Fort Worth stock, we have a nursery in Albuquerque, New Mexico, specializing in evergreens. They are well grown specimen plants—handled, balled and burlapped. Write for special quotations on this stock, which is acclimated to the West.

For these many years we have taken pride in serving our many regular customers. This we continue to do, and also welcome new customers.

TERMS AND CONDITIONS OF SALE

Thirty days net to firms of approved credit.

Two Per Cent discount for payment in **ten days** from date of invoice.

Six Per Cent interest charged on **past due accounts**.

C. O. D. orders must be accompanied by one-fourth cash.

Packing will be charged at cost on all orders except bulk truck or car shipments.

All Stock offered **F. O. B. Fort Worth, Texas.**

NOMENCLATURE. Standardized Plant Names used as reference whenever names appear in same.

GUARANTEE. We guarantee to send out healthy trees, true to name and free of disease, and if we fail in this, we stand ready, upon proper proof, to replace such stock, or refund the purchase price, but we do not hold ourselves liable for any amount greater than the original price. **WE DO NOT GUARANTEE STOCK TO LIVE.**

(300 or more of each variety at 1000 rate.)

THE *MORaine LOCUST

*Plant Patent No. 836

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older, attaining a height of 80 to 100 feet.

It grows more rapidly than the common type of locusts because of the absence of seed pods and thorns. This attribute, together with the small leaflets which mostly drift into the lawn between the blades of grass, makes little fall clean-up necessary. It stands pruning well but very little is necessary since the lower branches self-prune as the top grows wider. This makes it desirable for narrow street planting of small properties, as sufficient clearance can be maintained for any type of traffic.

QUALITY GROWN PATENTED ROSES

Texas and California Grown Patented Roses. Two years in the field. California grown roses available from our storage after Jan. 1, 1953.

Retail Price		Wholesale Price	
		10	100

LONS OF LIQUID
PLANT FOOD

NURISH FEEDS PLANTS NATURE'S WAY

Plants feed through both their roots and their leaves. When you apply NURISH ... some nourishment is taken in through the leaves, while the remainder is absorbed by the roots.

NURISH IS FULLY ABSORBED THROUGH ROOTS AND LEAVES

Plants can absorb food in only one way ... they MUST DRINK IT. Any nourishment you apply must turn to liquid before the plant can use it. NURISH, newest advance in the exciting science of plant nutrition, dissolves in water to provide a rich nutrient solution which actually feeds plants nature's way ... instantly.

TESTED 20-20-20 FORMULA BASED ON LATEST SCIENTIFIC RESEARCH

NURISH provides each of the three major foods essential to all plant life in equal amounts — balanced to the requirements of your plants without wasteful over-feeding of any one nutrient. Developed by research scientists of the Battelle Memorial Institute; manufactured by Naco Fertilizer Company, producer of agricultural fertilizers since 1907.
